

Airpax Instruments

To: All VDO (Airpax Instruments) Distributors and Sales Offices

Date: November 9, 1999

PRODUCT OBSOLESCENCE ANNOUNCEMENT
ALL N SERIES SENSORS

Effective immediately VDO will no longer accept orders for N Series bi-directional sensors. The decision is due to both economic and manufacturability reasons. Without sufficient customer need to generate the volume to support this product, VDO can no longer build the bi-directional sensors profitably. We do not know of any direct replacement for this product from any other source.

Please review any open quotations and immediately notify your customer. Any existing order will be completed, but no new orders will be accepted. In accordance with the Distributor Contract any inventory can be returned in the next 30 days for full credit; but after that time period, it can no longer be returned. Any warranty return will be credited only.

Any customer that has specific application problems can be referred to John Prinner or I for technical assistance.

We are deeply sorry for this situation, but the market place has not demonstrated a continued need for this unique product Airpax developed.
